8. CCR Title: Baseline Update September 2003 (#18)						
9. Originator Signature/Date Maryellen Corbett /s/ 09/12/03			10. Class II	11. Type: CCR	12. Need Date: 9/30/2003	
13. Office Manager Signature/Date Carolyn Whitaker /s/ 09/12/03			14. Category of Change: Update ECS Baseline Doc.		15. Priority: (If "Emergency" fill in Block 27). Routine	
16. Documentation/Drawings Impacted (<i>Review and submit checklist</i>): See attached sheet			17. Schedule Impact:		18. CI(s) Affected:	
19. Release Affected by this Change: N/A		20. Date due to Customer:		21. Estimated Cost: None - Under 100K		
22. Source Reference: <input type="checkbox"/> NCR (attach) <input type="checkbox"/> Action Item <input type="checkbox"/> Tech Ref. <input type="checkbox"/> GSFC <input type="checkbox"/> Other:						
23. Problem: (use additional Sheets if necessary) Some baseline inconsistencies were noted. These may involve installation or removal of COTS products to resolve identified baseline inconsistencies.						
24. Proposed Solution: (use additional sheets if necessary) Provide baseline red-lines and/or ECOs to resolve identified discrepancies. Attached sheet provides summary of baseline and system administration changes. These changes are also included in the ECO instructions for resolution of identified baseline discrepancies.						
25. Alternate Solution: (use additional sheets if necessary) None						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary) Inconsistent baseline and installations						
27. Justification for Emergency (If Block 15 is "Emergency"):						
28. Site(s) Affected: <input type="checkbox"/> EDF <input checked="" type="checkbox"/> PVC <input checked="" type="checkbox"/> VATC <input checked="" type="checkbox"/> EDC <input type="checkbox"/> GSFC <input type="checkbox"/> LaRC <input type="checkbox"/> NSIDC <input type="checkbox"/> SMC <input type="checkbox"/> AK <input type="checkbox"/> JPL <input type="checkbox"/> EOC <input type="checkbox"/> IDG Test Cell <input type="checkbox"/> Other

Telephone: 0703 **Office:** 2072C

Title of Change: Baseline Update September 2003 (#18)

CM Documents:

910-TDA-003: COTS Version Map
910-TDA-023: Critical COTS List
920-TDP-002: PVC Hardware/Software Map

Baseline / Document Updates (CM Documentation Only):

1. Add the version of named (bind) 8.2.2p5 to the COTS Version Map for reference: This product version is one that is delivered and patched with the Solaris 8 Operating System, and therefore would not usually be baselined. However, because of the security issues that are announced from time to time related to DNS and/or e-mail involving this utility, having the version published in the COTS version baseline would be useful for reference in reviewing potential security issues. This COTS should not be mapped to specific hosts and should not be identified in baseline audit interrogation as this product/version is delivered with the Solaris 8 Operating System.
2. Update eBorder Enterprise version to 4.02. Baseline query of current PSRed version returns this version.
3. Adjust the baseline of t1acs06, as follows: Baseline has changed since original single Sun Consolidation baseline was identified:
 - a. Remove Apache Server 1.3.26 from baseline (COTS not installed)
 - b. Add Anlpassword 3.0 to baseline (COTS Automounted)
 - c. Add Find D_DOS 4.2 to baseline (COTS Automounted)
 - d. Add Forte Compilers 6.2 (COTS installed)
 - e. Add Sun ONE Compilers 7.0 (COTS installed)
 - f. Add JRE 1.4.1-b21 (COTS installed)
 - g. Add OpenClient 12.0 (COTS Automounted - host has custom code installed)
 - h. Add PERL 5.6.1 (Automounted COTS)
 - i. Remove Remedy ARS 4.5.2 (COTS not installed)
 - j. Add TCL/tk 8.3.3 to the baseline (COTS Automounted)
 - k. Remove iPlanet 6.0 (COTS not installed)
4. Remove JDOM Beta8 from the baseline of t1dpg06. COTS product not installed and not needed by PDS.
5. Add JRE 1.4.1 to the baseline of t1dpg06. COTS product is required and is installed.

System Administration Tasks (See ECOs below):

1. EDC has identified the need for 4 additional ClearCase client licenses. CM has agreed that four licenses can be reallocated from the VATC allocation as ClearCase is not actively used in this environment:
Landover UNIX Administration: Update the number of concurrent users in the VATC to 1 - (PVC does not have CC installed).
LPDAAC Systems Administration: Update the number of concurrent users at LPDAAC to 9
2. Remove Forte 6.1 compiler from p0ais01, as no compilers are currently baselined for this host. No compilers were baselined for this host in order to limit compiler installations in the PVC, as they are not actively used in this environment. Version 6.1 is an obsolete version.
3. Remove HiPPI software 4.0 from p0dig06. HiPPI software no longer needed or used in PVC/VATC.
4. Apply EBF Patch 10493 to Sybase Replication Server installations on the following hosts, as described in PSR #914-TDA-213, Sybase Replication Server 12.5 for the ECS Project. Version is upgraded to version 12.5, but the EBF is not installed:
 - a. p0mss21
 - b. p2acs06
